Professional Summary

Junior Flutter Developer with hands-on experience building cross-platform mobile applications using Flutter and Dart. Proficient in Clean Architecture, REST API integration, Provider state management, and responsive UI development. Comfortable working across the full app lifecycle — from API integration and local persistence to authentication flows and polished, production-ready interfaces. Passionate about writing scalable, maintainable code and delivering seamless, high-quality user experiences.

Technical Skills

Languages: Dart, Python (Basic)

Frameworks: Flutter, Provider

Architecture: Clean Architecture

Backend & API: REST APIs, JSON Parsing

Database: Firebase, Hive, Shared Preferences

Tools: Git, GitHub, Android Studio, VS Code

Projects

E-Commerce App — Crafty Bay E-Commerce

Flutter, Dart, Provider, REST APIs

Personal Project

[GitHub](#)

- Architecture:** Built a feature-first e-commerce application with a modular folder structure, keeping each feature (auth, home, cart, product details) self-contained for easier scaling and maintenance.
- Networking Layer:** Designed a custom *NetworkCaller* class with request/response interceptors to centralize API calls, handle headers and tokens automatically, and standardize error handling across the app.
- Authentication & Security:** Implemented secure OTP-based email verification and registration flow, with token persistence for seamless auto-login on subsequent app launches.
- Shopping Experience:** Developed dynamic product category browsing, product details, and a fully functional cart management system using Provider for real-time state updates.

Professional Task Management Application

Flutter, Dart, Provider, REST APIs

Personal Project

[GitHub](#)

- Architecture & Development:** Architected and engineered a scalable task management application following Clean Architecture principles, enforcing strict separation between presentation, domain, and data layers for long-term maintainability.
- API & State Management:** Integrated backend REST APIs for secure user authentication and CRUD task operations, and implemented Provider for reactive UI updates and efficient asynchronous data handling.
- Usability:** Added task status tracking, form validation, and clear success/error feedback to create a smooth, dependable day-to-day task management experience.

Clean Architecture Music Player

Flutter, Dart, Audioplayers

Personal Project

[GitHub](#)

- Architecture:** Designed a modular music application cleanly separated into Domain, Data, and Presentation layers using Clean Architecture, making the codebase easy to test and extend.
- Media Playback:** Implemented background audio playback, playlist controls (play, pause, skip, seek), and real-time state updates using the Audioplayers package.
- UI/UX:** Built a responsive now-playing screen with animated controls and progress tracking for a smooth listening experience.

Money Management Application

Flutter, Dart, Provider, Local Storage

Personal Project

[GitHub](#)

- Expense Tracking:** Built a finance utility application to track income, expenses, and manage categorized transaction histories seamlessly across multiple custom categories.
- State & Persistence:** Utilized Provider alongside local persistence mechanisms to maintain financial records between sessions, with real-time calculation summaries and balance updates.
- Insights:** Added category-wise breakdowns and summary views to help users quickly understand their spending patterns.

Hangout Bangladesh (Travel UI)

Flutter, Dart

Personal Project

[GitHub](#)

- Responsive UI:** Designed and developed a responsive single-page travel application showcasing tourist destinations across Bangladesh, with custom cards, imagery, and smooth navigation between sections.
- Design Focus:** Focused on pixel-accurate UI implementation from design mockups, ensuring consistent spacing, typography, and layout across different screen sizes.

Education

Dinajpur Govt. City College

Dinajpur, Bangladesh

Higher Secondary Certificate (HSC)

2020

Dinajpur Zilla School

Dinajpur, Bangladesh

Secondary School Certificate (SSC)

2018

Certifications

App Development with Flutter

[View Certificate](#)

Hands-on certification in Flutter & Dart — covering Provider state management, REST API integration, and Clean Architecture practices.
